MEMORANDUM FOR: Chief, Procurement Division, OL

THROUGH: Chief, Support Staff, NPIC

SUBJECT: Contract [REDACTED]

REFERENCE: (a) Purchase Description for Contact Duplicating and Reseau Printer, dated 14 February 1964.
(b) Design Analysis Report for Contact Duplicating and Reseau Printer submitted by [REDACTED] letter dated 27 October 1964.

25X1
1. Paragraphs 3.8 and 3.9 of reference (a) have been interpreted by the GDMRADA contract monitor to include variable incremental exposure control along the length of the frame. This interpretation has been expressed to the [REDACTED] Program Leader during every monitoring conference, both before and since the award of the contract. Paragraphs 2.1 and 2.11 of reference (b) take exception to the requirement that incremental control of exposure along the length of the frame be included within the meaning of reference (a) as written.

2. Exposure control of the type described above is a firm requirement and should be understood by the contractor. It is therefore requested that the contractor be required to revise the Design Analysis Report reference (b), to reflect the exposure control requirement and to resubmit the report in the revised form, at which time it is felt it will be acceptable to the GDMRADA contract monitor.
